

THE UNIVERSITY
of NORTH CAROLINA
at CHAPEL HILL

Postdoctoral Position in Environmental Health and Nutrition

is available immediately to study the role of diet and nutrients in the diabetogenic effects of chronic arsenic exposure

Two lines of research are available for this position:

- 1. Laboratory studies using mouse models.**
- 2. A population study in Chihuahua, Mexico.**

Successful candidates should have a PhD degree in either Environmental/Nutrition Epidemiology or in Nutritional Biochemistry. Preference will be given to applicants with background in both areas and those who speak fluent Spanish.

Send or e-mail your application letter and c.v. to:
