Graduate Student Representative
Samantha Adams, BS
Rutgers University

Mission

The Mission of the CVTSS is to serve as the catalyst for the interaction and development of members of the Society of Toxicology with a vested interest in cardiovascular toxicology. The Specialty Section is committed to the identification, prevention, and/or amelioration of cardiovascular toxicities. The principal endeavor of this commitment is to encompass cardiovascular toxicology spanning mechanistic, translational, clinical, and epidemiology studies in regards to pharmacological, occupational, and public health.
