

Converting to a Widescreen (16:9) Presentation Format

Presenter expectations are escalating, ever intensifying the challenge to meet the rising demand for more sophisticated technology and connectivity. When you select PSAV[®], a perfect partnership is formed that delivers innovative resources and legendary customer service to create truly memorable experiences.

PSAV[®] has seen a growing number of requests from clients of various industries to provide audiovisual equipment that will accommodate for the widescreen (16:9) presentation format. In an effort to provide outstanding support for your presenters, instructional documentation is available to assist them with converting their existing presentation files from a standard (4:3) to the widescreen (16:9) format.

Before sharing these documents with your presenters, it is important that you have discussed with your PSAV[®] sales manager the use of audiovisual equipment that will support a widescreen format. This includes 16:9 projection screens, LCD projectors capable of projecting a widescreen image and making sure computer monitors available in the speaker ready room and meeting rooms are widescreen.

Guidelines for presenters using:

Microsoft Windows

[Office PowerPoint 2010](#)

[Office PowerPoint 2013](#)

Apple Macintosh OSX

[Apple Keynote 6.5](#)

[Office PowerPoint 2011 for Mac](#)

Additional Support:

For events using the Content1 Presentation system, speakers will have access to the Content1 support team to assist with the format changes and further clarification of the guidelines.

Content1 Support Phone: 214.210.8006 (Monday through Friday 8:00am to 5:00pm Central)
Content1 Support Email: support@psavds.com
