Synopsis:

TSCA was amended in June, 2016 by the Frank R. Lautenberg Chemical Safety Act. Amendments to TSCA include prohibition or restriction of new chemicals or significant new uses of existing chemicals that fail to meet EPA's risk-based safety standard; increased public transparency of chemical information, and mandated chemical safety reviews of chemicals in commerce. One year later, it is critical to identify TSCA successes as well as needed improvements to protect public health and reduce toxics in the environment. This joint symposium is being hosted by the National Capital Area Chapter of SOT (NCAC) and the American Chemical Society's Local Section, the Chemical Society of Washington Chapter (CSW). Listen to diverse viewpoints from the U.S. EPA, the American Chemistry Council, the Natural Resources Defense Council, and other experts to learn about TSCA first-hand!

Tentative Agenda:

Time	Topic	Speaker
8:30-9:00 AM	Registration opens
