

PANWAT

Pacific Northwest Association of Toxicologists

2011 Annual Meeting - October 6-8

THE ART AND SCIENCE OF RESEARCH TRANSLATION IN TOXICOLOGY

Given the importance of toxicological research in society, it is critical that scientists effectively translate research findings to diverse audiences to inform public health actions and science-based policies. Examples of translation include communicating with broad audiences, using new information or approaches to assess and manage risk, transferring tools and technology to stakeholders and assisting officials and communities. An emphasis on regional approaches to translating toxicological research will be highlighted at this years annual meeting.

2011 PANWAT Conference Schedule:

Thursday Evening: Registration, Science Communication Workshop and Particles on the Wall Art Exhibit

Friday Morning: Research Translation in Toxicology; Keynote: **Dr. Clement Furlong, U. Washington**

Friday Box Lunch Tour: Eagle Creek Salmon Hike and Fish Contaminant Discussion (Lead by Dr. Dave Stone, Oregon State University)

Friday Afternoon: Community Engagement in Toxicology; Keynote: **Dr. Erica Woodahl, U. Montana**

Friday Evening: Social Reception and Student Poster Presentation

Saturday Morning: Interdisciplinary Approaches to Toxicology; Keynote: **Dr. Peter Senter, Seattle Genetics**

ABSTRACT SUBMISSION DEADLINE: SEPTEMBER 22

Location:

Bonneville Hot Springs
Columbia Gorge, North Bonneville, WA

BOOK EARLY: Rooms will be held for PANWAT until September 6th (509-427-7767, Ext. 0)
