

2013 Annual Meeting – September 19-20

Risk Assessment in Developmental and Reproductive Toxicology

Reproductive and developmental toxicology is integral in risk assessment of pharmaceuticals, agrochemicals, consumer products, industrial compounds, nanomaterials and other xenobiotics. In a quality risk assessment, toxicologists identify hazards, assess risk using science-based data, and communicate risks appropriately for each audience. In support of this critical role, the Pacific Northwest Regional Chapter of the Society of Toxicology will convene at the 2013 Annual PANWAT meeting and share recent advances in risk assessment in developmental and reproductive toxicology. Please join us on September 19 and 20.

Location:

Amgen, 1201 W Amgen Ct, Seattle, WA
