

AACT session

Session Chairs

Z. Alex Xu, PhD, DABT

Chief Scientist in Pharmacology and Toxicology, CFDA/CDE

Robert Li PhD, DABT

Senior Scientist/Toxicologist, Pharmacology SubTeam Leader, Safety Assessment, Genentech

Z. Alex Xu, PhD, DABT

Chief Scientist in Pharmacology and Toxicology, CFDA/CDE

Title: Nonclinical Safety Evaluation of Drug Products for Advanced Therapy from the Regulatory Perspective

Yi Jin, PhD, DABT

Vice President and Chief Scientific Toxicologist at WuXi AppTec (Suzhou) Co., Ltd, Toxicology Services.

Title: Special Considerations of Nonclinical Safety Evaluation on Biologics

Matt Liu, PhD, DABT

Senior Staff Scientist, Regeneron Pharmaceuticals

Title: Complexities of preclinical development for antibody drug conjugates

Ting Su, PhD, DABT

Associate Director Associate Director, Drug Safety Evaluation, Bristol-Myers Squibb

Title: Toxicology considerations in nonclinical development of combination biotherapeutics

Qihong Huang, PhD, DABT

Senior Principal Scientist, Boehringer Ingelheim Pharmaceuticals Inc.

Title: Nonclinical Safety Assessment of Intravitreal Biologics

Robert Li, PhD, DABT

Senior Scientist/Toxicologist, Pharmacology SubTeam Leader, Safety Assessment, Genentech

Title: Biological Advances to Help Navigate the Nonclinical Safety Assessment Strategy in Cancer Immunotherapy: Utility, Limitations, and Future Direction

AACT members in other sessions

Zhibin Wang, PhD

Assistant Professor, Department of Environmental Health and Engineering, Bloomberg School of Public Health, Johns Hopkins University

Title: Uncharted territory: a mechanism of regional “autosomal chromosome inactivation” in human development and public health?

X. Sherwin Yan, PhD, MD, DABT, ERT

Global Director, Global Product Safety and Regulatory Compliance, Newell Brands Inc., Home Fragrance Division

Title: Human Exposure and Health Risk Evaluation of Emissions from Fragranced Consumer Products

Zemin Wang, MD, PhD, DABT

Research Assistant Professor, Laboratory of Investigative Toxicology and Pathology, School of Public Health, Indiana University

Title: Triclosan - Exposure, Health Effects and Mechanisms of Action

Pan Chen, PhD

Research Assistant Professor, Department of Molecular Pharmacology, Albert Einstein College of Medicine

Title: BTBD9, a restless legs syndrome associated protein, regulates manganese-induced toxicity in *Caenorhabditis elegans*
