V. **Feedback and Ideas:**

A. How might SOT better support your group’s activities (perhaps something the Society should be doing that we currently do not do, or do not do effectively, that would be of importance/benefit to the members of your component group?):

Note: If funding is listed, please provide detail on the membership need that the funding would support.

- *The current support is excellent.*

B. What is one thing that the Society is currently doing that impacts your component group that should be changed (e.g., stopped, modified, etc.)? N/A

C. What changes does your component group anticipate making in the way in which it operates in the coming year?

- *We are going to revamp the website this coming year and the explore possibilities to increase our membership.*
- *We are planning to organize and host more frequent webinar series to highlight areas of interest for carcinogenesis research. By hosting webinars, we are allowing opportunities for researchers to virtually share research, as well as provide more training for early career scientists.*
