

## GRADUATE STUDENT TRAVEL GRANTS

Graduate Student Travel Grants are available on a one-time only basis to graduate students presenting papers or posters at the Annual Meeting. Applications are available from SOT Headquarters.

## SPONSORED AWARDS

### THE BURROUGHS WELLCOME TOXICOLOGY SCHOLAR AWARD

Under the administration of the Society of Toxicology, The Burroughs Wellcome Fund offers a five-year Toxicology Scholar Award of \$350,000 to an individual working in the field of toxicology in a recognized U.S. school in the life sciences. The primary aim of the program is to support the career development of toxicologists and to stimulate teaching, training and research in academic institutions that have made a commitment to toxicology as a basic science.

The program is designed to help provide an increased number of toxicologists training in understanding the interactions of chemicals with biological systems. Selection is made on the basis of the demonstrated ability and potential of the candidate, the strength of the commitment for program expansion, the quality of expansion plans, and relative importance of the Award to the success of the proposed program expansion.

### GRADUATE STUDENT FELLOWSHIP AWARDS

The Society of Toxicology Graduate Student Fellowship Awards are open to any graduate student with at least two years of graduate study towards a Ph.D. degree in the area of toxicology and whose major professor is a member of the Society of Toxicology. Evaluation by the Education Committee is based primarily on originality of the dissertation research, research productivity, relevance to toxicology, scholastic achievement and letters of recommendation. Applications are available from SOT Headquarters.

## ZENECA, LTD. (formerly ICI) TRAVELING LECTURESHIPS

The ICI Traveling Lectureships are presented by the Society of Toxicology in recognition of excellence in research and service in toxicology. The ICI Central Toxicology Laboratory and ICI Americas provide one or two awards annually to promote greater collaboration between European and North American toxicologists and to enable North American toxicologists to undertake a three to four-week lecture tour of Europe. The awards are intended to familiarize the recipients with research and regulatory issues in Europe as well as to bring a North American perspective to these issues.
